ART CHARITY AUCTION

07th-14th JUNE 2020

**ART'S
ANGELS**

“Art’s Angels”

Art Charity Auction

Foreword

The “Art’s Angels” project is promoted by internationally know artist Maupal together with non-profit organizations Associazione Domna e Associazione Jeos, with the support of non-profit organization Fondazione Pangea Onlus, FSCIRE Fondazione per le Scienze Religiose, FAIRTRADE ITALIA and artist collective Darehood, **with the aim of giving opportunities, create and foster human value in an historic moment of huge uncertainty, through an art charity auction to help women living a violence condition.**

Art and creativity are by nature the language of “possible” and are the tools chosen by this project to support a non-profit organization which is committed every day to women’s well-being and even more for those in need who are beginning paths to change their lives for the better.

Some of the artists – whose names will be revealed in the next few days - have been invited directly and there will be a call for others so to create and donate 75 unique artworks for a charity auction that will take place the second week of June 2020.

The charity auction donations will go to **Fondazione Pangea Onlus**, operating since many years in supporting projects for the empowerment of women who are living difficult social-economic situations and helping women who are victims of violence and discrimination, both in Italy and abroad.

Why the title “Art’s Angels”

In the famous 70s’ tv series “Charlie’s Angels”, Charlie is the patron who, while staying behind the scenes, leaves the stage to the real protagonists, the smart and revolutionary – for the time – professionals known as “angels”. In this project Art becomes a person and an angel, too, and the real protagonists are the women artists whom Maupal/Charlie is going to *share* the stage with to tangibly share the goal of this event that is to fight abuses and discriminations against women through art and to support women empowerment paths, being aware that to succeed in a cultural change that will allow the cancellation of gender discriminations and violence we need the commitment of all human beings.

The tv series confronted important, thorny and for the time ground-breaking matters like women’s work conditions and crimes connected with sexist job places, debating about women as sexual objects, violence and hate crimes against women, prostitution and its exploitation, harassment and stalking. On the other side positive and empowerment themes were finally faced: women’s solidarity, the strength and courage of women, women’s great performances in jobs considered as typical of men, women’s independence, gender politics, feminism, women workers conditions.

Even where critics found these arguments still too weak, the public of all genders and ages proved to deeply understand their meanings also when hidden and widely appreciated the program. *Discrimination and gender violence must be tackled as much as empowerment and change shall be enhanced. Both processes belong to all of us human beings: women, men, transgenders and gender free.*

Beneficiaries

Beneficiaries of the donations will be women within REAMA Anti Violence Net of Fondazione Pangea Onlus projects:

*“During COVID 19 pandemic restrictions **home has not been a safe place for all women.***

These months have been a double trap for who is living a situation of domestic violence because both the isolation imposed by the violent man and by health safety have increased. To all this we shall add the discomfort of women’s daughters and sons who are collateral victims of witnessed violence and have been forced to stay home without school, sports or places where to confide to what happens at home.

United Nations has declared that during lockdown from Covid-19 emergency the formerly widespread level of domestic violence has increased.

Fondazione Pangea Onlus is on women side since twenty years and has rallied straight away to help: women kept writing to our two online free help desks sportello@reamanetwork.org for physical, psychologic violence and stalking, and miaeconomia@reamanetwork.org for economic violence. We explained them all our services for them and gave them suggestions on how to deal with their situations according to their needs.

We have worked with REAMA Anti Violence Net – promoted by Pangea since two years ago – which kept working with all its services adapted to new needs and to the new situation caused by the lockdown, with women being forced to stay inside with their abusers, often together with their daughters and sons.

Now, after the emergency, the need arises.

Today in phase 2 and tomorrow in phase 3 of the Covid-19 emergency, Pangea is supporting abused women and their daughters and sons. Despite the consistent measures taken by the institutions and Government, it is difficult for everybody and even more for these women to come out from the additional problems caused by the lockdown. This is why we are here and will be here in the future for them.

Let us give each of these women an opportunity to start again from herself!

Each human being can contribute and feel part of this project by giving to women and their daughters and sons the opportunity and instruments for a better life.

Please help us to let them out of fear and violence so that no one of them shall feel alone, anymore.

Donate.
